My neighbour saw an advert for a [cheap used BMW in London](#) and brought it round to show me. He knew I was in the market to change my car and also knew I was never one to miss a bargain or bag myself a great deal. The car dealer was located in Kent and called Big Motoring World. I had a look at their website and I have to say it was pretty impressive. Not only did they stock all used BMW, they had over 450 different models all at the one garage. Within two hours, I had found my dream car, got a fair part exchange valuation and arranged my car finance. So far so good is all I can say.
